

SHUSHAY KEBEDEW

Addis Ababa, Ethiopia | +251-943 668 796 | shushaykebedew12@gmail.com | [GitHub Link](#)

PROFESSIONAL SUMMARY

Full -Stack Developer with front-end specialization and over two years of professional experience building scalable, high-performance web applications using React, Next.js, TypeScript, Node.js, Express, and PostgreSQL. Experienced in designing modern user interfaces, developing secure REST APIs, and delivering production-ready software for international clients. Strong foundation in software architecture, performance optimization, and reusable component design, with a passion for building maintainable, user-focused applications that solve real business problems.

EDUCATION

Bachelor of Science in Information Technology |

Mekelle University

2018 - 2025

Mekelle, Ethiopia

- Completed a five-year undergraduate program in Information Technology and graduated with High Distinction and a CGPA of 3.8/4.0.
- 2018 – 2020 (paused due to national crisis; resumed 2023 – 2025)

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Blih Marketing and Communications PLC

06/2026 - Present

Addis Ababa, Ethiopia

- Architected and built full-stack web applications using React, Next.js, TypeScript, Tailwind CSS, Node.js, Express and PostgreSQL, translating business requirements into production-ready features.
- Design reusable frontend components and modular application architectures that improve maintainability and accelerate feature development.
- Designed and implemented secure backend services — API design, JWT authentication, and data management — following clean-architecture principles to keep the codebase maintainable as the product grew.
- Optimize application performance, accessibility, SEO, and cross-browser compatibility to deliver responsive user experiences.
- Collaborate with designers, product stakeholders, and developers throughout the software development lifecycle to deliver production-ready solutions.

Frontend Developer | Metnee Systems PLC

02/2025 – 06/2026

Addis Ababa, Ethiopia

- Delivered production-grade web applications using React, Next.js, and TypeScript, converting business requirements and design specs into maintainable, reusable code.
- Built scalable frontend architectures with reusable components and optimized state management, improving code quality and long-term maintainability.

- Integrated REST APIs and partnered with backend engineers to ship authentication workflows and data-driven features.
- Collaborated directly with South Korea-based clients and UI/UX designers, delivering pixel-perfect, bilingual interfaces aligned with project objectives.

Frontend Developer (Internship) | Metnee Systems PLC

09/2024 - 01/2025

Mekelle, Ethiopia

- Developed and maintained administrative dashboards using React.
- Integrated REST APIs supporting authentication, job management, and platform functionality.
- Built reusable UI components while collaborating with backend engineers to deliver production-ready features.

PROJECTS

Ethiopia Real Estate Awards (ERA) | <https://ethio-real-estate-awards.vercel.app/>

- Developing a comprehensive award management platform supporting nominee registration, judge scoring, event management, gallery management, and public voting.
- Building scalable admin and public-facing applications using Next.js, TypeScript, Node.js, PostgreSQL, and Tailwind CSS.
- Implementing role-based authentication, REST APIs, and reusable application architecture.

Katech Driver Data Platform | <https://katech-local.vercel.app>

- Contributed to the development of a role-based data management platform using Next.js, React, TypeScript, and Tailwind CSS.
- Developed reusable UI components, dashboard interfaces, and data management features to support different user roles and workflows.
- Integrated RESTful APIs, implemented state management with Zustand, and delivered pixel-perfect interfaces based on design specifications to ensure a consistent and high-quality user experience.

Macha Taximeter | <https://macha-taximeter.vercel.app/>

- Developed a digital taximeter application that automates fare calculation based on distance, travel time, and configurable pricing rules.
- Implemented ride tracking, trip history, and fare management features to streamline taxi operations and improve pricing accuracy.
- Integrated RESTful APIs to synchronize trip data and support efficient fare processing and reporting.

Sheqlee Freelancing Platform | <https://sheqlee-admin-panel.vercel.app>

- Developed a freelancing platform that connects businesses with freelancers, enabling efficient project posting, application management, and collaboration.
- Implemented job posting, application management, and user authentication to streamline the hiring workflow.
- Built an administrative dashboard with role-based access control for managing users, jobs, and other platform content.

Glitch Corporate Landing Page | <https://glitch-ui.vercel.app>

- Developed a high-performance, bilingual corporate landing page tailored for a South Korean client, focusing on responsive design principles and highly optimized user journeys.
- Engineered automated email workflows utilizing Node.js and Nodemailer, incorporating rigorous form validation, auto-replies, and comprehensive error handling.

Bellboy Delivery | <https://bellboy-delivery.vercel.app>

- Developed a delivery tracking platform with smooth animations that visualize the complete delivery workflow from request to completion.
- Created an engaging interface with step-by-step status updates to improve delivery visibility and user experience.

Cafe Ordering System | <https://x-cafe-system.vercel.app>

- Built a modern, QR-based contactless cafe ordering platform enabling customers to scan QR codes, browse dynamic menus, and place mobile orders.
- Developed a comprehensive admin dashboard equipped with real-time order synchronization, menu management, and operational monitoring tools.

AI-Powered Fraud Detection System |

<https://github.com/shushaykebedew/ai-powered-fraud-detection>

- Developed a production-oriented machine learning fraud detection platform as a final-year AI project, combining an XGBoost-based risk scoring model, FastAPI backend, and Next.js dashboard for real-time transaction analysis.
- Built end-to-end ML pipelines for data preprocessing, feature engineering, model evaluation, and deployment with SHAP-based explanations to identify the factors behind suspicious transaction predictions.
- Implemented a full-stack fraud monitoring system with authentication, transaction scoring, prediction history, batch analysis, and model performance monitoring capabilities.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Frontend:** HTML, CSS, React, Next.js, Tailwind CSS, Svelte, SvelteKit, Framer Motion
- **Backend:** Node.js, Express.js, REST APIs, Authentication, JWT
- **Databases:** PostgreSQL, MySQL, MongoDB, Sequelize, Prisma
- **State & Data:** Zustand, TanStack Query, Axios, React Hook Form
- **Tools & Technologies:** Git, GitHub, CI/CD, Google Maps API, Figma, Vercel, Netlify, Render, Cloudinary, next-intl

CERTIFICATIONS & LANGUAGES

- **Certifications:** Machine Learning Specialization (Coursera), Cybersecurity Fundamentals (IBM), AI, Data Analysis, and Programming Fundamentals (Udacity)
- **Languages:** Tigrigna (Native), Amharic (Fluent), English (Proficient)
