👤 PROFILE INFO

Full-stack web developer with strong experience building scalable web applications using React, Next.js, Node.js, and modern databases (MySQL, MongoDB). Skilled in designing responsive user interfaces, developing RESTful APIs, and delivering maintainable, high-performance solutions. Passionate about creating reliable web applications and contributing to modern software development teams.

🎓 EDUCATION

Bachelor of Science in Information Technology

Mekelle University

2018 – 2025

Mekelle, Ethiopia

- Completed a five-year undergraduate program in Information Technology with a stellar CGPA of 3.8/4.0, graduating with high distinction.
- 2018 – 2020 (paused due to national crisis; resumed 2023 – 2025)

💼 EXPERIENCE

Frontend Developer

Blih Marketing and Communications PLC

06/2026 – Present

- Develop and maintain responsive, high-performance web applications using React, Next.js, TypeScript, and Tailwind CSS.
- Build reusable, scalable UI components and integrate RESTful APIs following modern frontend best practices.
- Collaborate with designers and backend developers to deliver intuitive, user-centered features.
- Optimize application performance, accessibility, SEO, and cross-browser compatibility for an excellent user experience.

Frontend Developer

Metnee Systems PLC

02/2025 – 06/2026

Addis Ababa, Ethiopia

- Develop and optimize responsive user interfaces for production systems.
- Collaborate with backend and design teams to ensure scalable architecture.
- Focus on performance, usability, and maintainability in production environments.
- Collaborate with international clients, including teams from South Korea, to deliver web solutions aligned with business requirements and project goals.
- Implement pixel-perfect user interfaces from design specifications, ensuring consistency, responsiveness, and a high-quality user experience across devices.

Frontend Developer (Internship)

Metnee Systems PLC

09/2024 – 01/2025

Mekelle, Ethiopia

- Built and optimized admin dashboard for freelancer/job management system
- Integrated backend APIs for authentication, job posting, and payments
- Improved UI responsiveness and system usability for production deployment

📁 PROJECTS

Katech, Driver Data Platform

- Engineered a user interface for a driver data platform enabling corporate clients to view, manage, and analyze video datasets with AI-driven insights.

- Built responsive dashboards to improve usability and streamline data interaction across different workflows.

Web: (<https://katech-local.vercel.app/> )

Macha Taximeter

- Developed a digital taximeter application for automated fare calculation based on distance and time.
- Implemented ride tracking and fare management features to improve transparency and operational efficiency.

Demo: (<https://macha-taximeter.vercel.app/> )

Sheqlee Freelancing platform

- Built a web platform connecting companies with freelancers for structured project management and collaboration.
- Implemented core features for job management and secure transaction workflows between users.

Demo: (<https://sheqlee-admin-panel.vercel.app/> )

Glitch - Landing Page

- Built a high-performance bilingual corporate landing page for a Korean client with responsive design and optimized user experience.
- Implemented automated email workflows using Node.js and Nodemailer, including form validation, auto-replies, and error handling.

Demo: <https://glitch-ui.vercel.app/> 

Bellboy Delivery

- Developed a delivery tracking platform with smooth animations that visualize the complete delivery workflow from request to completion.
- Created an engaging interface with step-by-step status updates to improve delivery visibility and user experience.

Demo: <https://bellboy-delivery.vercel.app/> 

X-Cafe — Cafe Ordering System

- Built a QR-based cafe ordering platform where customers scan codes, browse menus, and place orders through a mobile interface.
- Developed an admin dashboard with real-time order updates, menu management, and monitoring tools to optimize cafe operations.

Demo: (<https://x-cafe-system.vercel.app/> )

AI-Powered Fraud Detection for Ethiopian Banking and Mobile Payment Systems

- Developed a machine learning-based fraud detection system to identify suspicious financial transactions in banking and mobile payment systems.
- Designed data processing pipelines to support transaction monitoring and risk analysis.

Automated ID verification

- Developed a secure identity verification system using unique scannable QR codes for fast and reliable authentication.
- Implemented streamlined verification flows to reduce manual checks and improve operational efficiency.

TECHNICAL SKILLS

Frontend: HTML, CSS, React, Next.js, Tailwind CSS, Svelte, SvelteKit,

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, Google Maps API, Postman

Programming Languages: JavaScript, TypeScript, Python
